Forecast for Sunday 19 May 2024

Weather: Any mist or valley fog soon clearing after dawn to leave plentiful amounts of sunshine. Some fair weather cloud bubbling up with a very slim chance of a localised heavy shower, though most likely staying entirely dry. A fine and warm evening to come.

Chance of cloud-free hill tops above 600m: >95%.

Low cloud and visibility: Patchy mist and fog soon clearing then any cloud above summits. Locally poor visibility first thing but otherwise very good.

Forecast for Monday 20 May 2024

Weather: The chance of more widespread low cloud developing during the early hours. This soon clearing after dawn to leave another mainly dry day with sunny spells. An outside chance of a shower during the afternoon. Feeling warm in the strong sunshine with very high UV levels during the middle of the day.

Maximum wind: North-easterly 10-15 mph.

Chance of cloud-free hill tops above 600m: 70% becoming 100% by mid-morning.

Low cloud and visibility: Patches of cloud around 300-400m at first, soon lifting and clearing by mid-morning. Thereafter all cloud above summits. Locally poor visibility in cloud at first, otherwise good views of distant hills and landmarks.

Temperature: **Valleys:** Plus 7 Celsius rising to plus 21 Celsius.
At 600m: Plus 7 Celsius rising to plus 16 Celsius.
Freezing level: Well above the summits.
